

## **Virtualization**

### **Instruction for Installation of 2x Client for Virtualization**

The purpose is to provide easy access to engineering software used at CHBE for laptop users.

#### **The procedure to install 2x client for access to the application server:**

1. Download 2x client from <http://www.2x.com/rdp-client>
2. Install the client. During installation, you are asked whether to install single sign-on or not, choose No.
3. When running 2x client for the first time, it will ask you to setup a new connection. Click Yes to proceed.
4. Enter the following info:
  - a. Primary Connection: 2xapp1.chbe.ubc.ca
  - b. Connection Mode: Gateway Mode
  - c. Port: 8080
  - d. Alias: (Leave it as blank)
  - e. Auto Logon: Checked
  - f. Username: Your username for logging on lab computers
  - g. Password: Your password
  - h. Save Password: Checked
  - i. Domain: chbe\_labs
5. Click Ok to finish

#### **The procedure to access published applications:**

1. Open 2x client.
2. Double click the application shortcut to open the program

### **Connecting to CHBE\_LABS Wireless Network**

The CHBE\_Labs wireless network is an alternative of UBCsecure for users connecting to Internet. When you have difficulty to connect to ubcsecure, you may connect to access point called chbe\_labs in your wireless list.

Once connected, open web browser and enter your credentials for logging onto lab computers. You will be connected if authenticated.
